

A box plot comparing the distribution of 'SOZ Type' for two categories: 'Mesial Temporal' and 'Other'. The y-axis represents the frequency or count of cases. The 'Mesial Temporal' group is represented by a red box, and the 'Other' group is represented by a brown box. The plot shows that the 'Mesial Temporal' group has a higher median and greater variability than the 'Other' group. A horizontal line with four asterisks (****) indicates a statistically significant difference between the two groups.

SOZ Type	Median	Q1	Q3	Min	Max
Mesial Temporal	~15	~10	~25	~5	~45
Other	~10	~5	~20	~2	~30
