

This heatmap displays the distribution of mesial temporal lobe resection (MTL) and other patients across 10 channels. The color scale ranges from dark purple (low) to yellow (high). The legend indicates that orange represents Mesial Temporal Patients and blue represents Other Patients.

The heatmap shows a clear pattern of activity across the channels. The top row (Channel 1) shows low activity for both groups. The second row (Channel 2) shows low activity for Mesial Temporal Patients and moderate activity for Other Patients. The third row (Channel 3) shows low activity for both groups. The fourth row (Channel 4) shows low activity for Mesial Temporal Patients and moderate activity for Other Patients. The fifth row (Channel 5) shows low activity for both groups. The sixth row (Channel 6) shows low activity for Mesial Temporal Patients and moderate activity for Other Patients. The seventh row (Channel 7) shows low activity for both groups. The eighth row (Channel 8) shows low activity for Mesial Temporal Patients and moderate activity for Other Patients. The ninth row (Channel 9) shows low activity for both groups. The tenth row (Channel 10) shows low activity for both groups.
